Deer New Jersey Landowners,

You can help New Jersey find balance.

Every extra antlerless deer harvested responsibly can mean healthier forests, safer roads, and more meals for New Jerey families. You are uniquely positioned to do what few others can.

This season, **consider inviting hunters to harvest at least one more antlerless deer** *(wherever permitted and practical)* from your land and sharing venison through your network and New Jersey's donation pathways.

You are **#StewardsOfTheLand**

Share your donation stories, favorite venison recipe and land you're helping to protect while nourishing more people. Tag **@deernj** on social media and use **#StewardsOfTheLand** to inspire others to join the effort

DEER NEW JERSEY,

Let's find balance for our forests, farms, and families.
